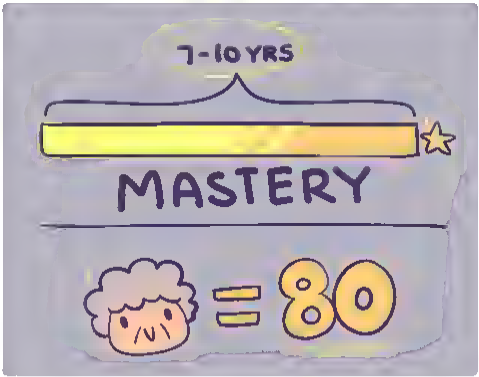
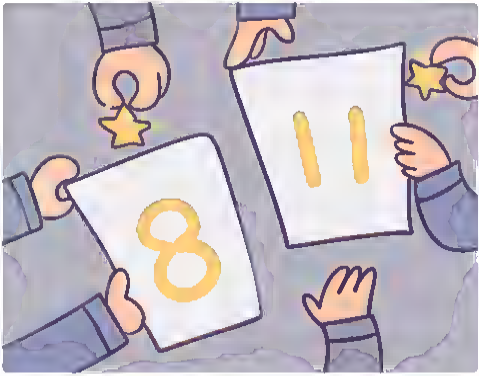
ON AVERAGE, IT TAKES 7-10 YEARS TO MASTER SOMETHING, AND THE AVERAGE LIFE EXPECTANCY OF A PERSON IS AROUND 80 YEARS.



THIS MEANS YOU HAVE 8–11
CHANCES TO MASTER SOMETHING,
OR EVEN SEVERAL THINGS.



SO IF YOU THINK YOU "CAN'T LEARN SOMETHING" OR "IT'S TOO LATE", THINK AGAIN.

YOU'VE ALREADY MASTERED A LOT OF THINGS YOU DON'T GIVE YOURSELF CREDIT FOR.

DEAR DEVIN: Q&A #1

I realized I've been on Webtoon for 1 year and have yet to do a Q&A. So here it is :)

Do you have a question for me?
What's my opinion on something?
Can I draw X, Y and Z?
Ask me anything in the comments!

Begin your question with, "Dear Devin, [...]".
